

# Recombinant Full Length Human Sodium/Potassium-Transporting Atpase Subunit Gamma(Fxyd2) Protein, His-Tagged

**Cat. No.** RFL21318HF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                           |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Human Sodium/potassium-transporting ATPase subunit gamma(FXYD2) Protein (P54710) (1-66aa), fused to N-terminal His tag, was expressed in E. coli. |
| <b>Species</b>          | Human                                                                                                                                                                     |
| <b>Source</b>           | E.coli                                                                                                                                                                    |
| <b>ProteinLength</b>    | Full Length (1-66)                                                                                                                                                        |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                        |
| <b>AA Sequence</b>      | MTGLSMDGGGSPKGDVDPFYDYETVRNGGLIFAGLAFIVGLLILLSRRFRCGGNKK<br>RRQINEDEP                                                                                                     |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                               |
| <b>Applications</b>     | SDS-PAGE                                                                                                                                                                  |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                       |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                         |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

## GENE INFORMATION

**Gene Name**

FXYP2

**Synonyms**

FXYP2; ATP1C; ATP1G1; Sodium/potassium-transporting ATPase subunit gamma; Na(+)/K(+) ATPase subunit gamma; FXYP domain-containing ion transport regulator 2; Sodium pump gamma chain

**UniProt ID**

[P54710](#)
