

Recombinant human BEND6, His-tagged

Cat. No. BEND6-2441H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human BEND6 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography.
Species	Human
Source	E.coli
Description	BEND6, as known as BEN domain-containing protein 6, is a neural BEN-solo factor that shares many functional attributes with Drosophila Insensitive, a co-repressor for the Drosophila CSL factor. This protein binds the mammalian CSL protein CBF1 and antagonizes Notch-dependent target activation. In addition, its association with Notch- and CBF1-regulated enhancers is promoted by CBF1 and antagonized by activated Notch. In utero electroporation experiments showed that ectopic BEND6 inhibited Notch-mediated self-renewal of neocortical neural stem cells and promoted neurogenesis.
Form	Liquid. 20mM Tris-HCl buffer (pH8.0) containing 10% glycerol 0.1M NaCl
Molecular Mass	33.6kDa (302aa), confirmed by MALDI-TOF

Purity >90% by SDS - PAGE

Applications SDS-PAGE

Storage Can be stored at +4C short term (1-2 weeks). For long term storage, aliquot and store at -20C or -70C. Avoid repeated freezing and thawing cycles.

Concentration 1 mg/ml (determined by Bradford assay)

GENE INFORMATION

Gene Name [BEND6 BEN domain containing 6 \[Homo sapiens \]](#)

Official Symbol BEND6

Synonyms BEND6; BEN domain containing 6; C6orf65, chromosome 6 open reading frame 65; BEN domain-containing protein 6; bA203B9.1; FLJ30162; C6orf65;

Gene ID [221336](#)

mRNA Refseq [NM_152731](#)

Protein Refseq [NP_689944](#)

UniProt ID [Q5SZJ8](#)

Chromosome Location 6p12.1
