

Recombinant human CCM2, His-tagged

Cat. No. CCM2-2496H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human CCM2 protein, fused to His-tag at N-terminus, was expressed in E.coli and purified by using conventional chromatography.
Species	Human
Source	E.coli
Description	CCM2 provides instructions for making a protein called malcavernin, which strengthens the interactions between cells that form blood vessels and limits leakage from the vessels. It interacts with a number of other proteins to form a complex that is found in the junctions that connect neighboring cells. It helps turn off (suppress) a signaling molecule known as RhoA-GTPase.
Form	Liquid. 20mM Tris-HCl buffer (pH8.0) containing 20% glycerol 1mM DTT
Molecular Mass	34.3kDa (311aa) confirmed by MALDI-TOF

 45-1 Ramsey Road, Shirley, NY 11967, USA

Purity	>90% by SDS - PAGE
Applications	SDS-PAGE
Storage	Can be stored at +4C short term (1-2 weeks). For long term storage, aliquot and store at -20C or -70C. Avoid repeated freezing and thawing cycles.
Concentration	0.5 mg/ml (determined by Bradford assay)

GENE INFORMATION

Gene Name	CCM2 cerebral cavernous malformation 2 [Homo sapiens]
Official Symbol	CCM2
Synonyms	CCM2; cerebral cavernous malformation 2; MGC4067;
Gene ID	9225
Chromosome Location	-
