

Active Human CCL3

Cat. No. CCL3-109H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	It is a synthetic Protein
Species	Human
Description	MIP-1 (Macrophage Inflammatory Protein 1 or CCL3) is a monocyte chemoattractant which has chemoattractant and adhesive effects on lymphocytes, preferentially attracting CD8+ cells. MIP-1 has also been shown to attract B cells and also eosinophils. It has also been identified as a stem cell inhibitory factor which can inhibit the proliferation of hematopoietic stem cells in vitro and in vivo. Receptors for MIP-1 are CCR1 and CCR5.
Form	Lyophilized
Bio-activity	Activity measured by the protein's ability to chemoattract cultured human monocytes. ED50 for this effect is 2-12 ng/ml.
Applications	Activity Assay
Storage	Product should be stored at -20°C. Aliquot to avoid freeze/thaw cycles
Reconstitution	Recommended reconstitution in sterile phosphate buffered saline which contains at least 0.1% human or bovine serum albumin to prepare a stock solution of no less than 20 µg/ml and vortex thoroughly.
