

# Recombinant Full Length Mouse Transmembrane Protein 138(Tmem138) Protein, His-Tagged

**Cat. No.** RFL7200MF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Mouse Transmembrane protein 138(Tmem138) Protein (Q9D6G5) (1-162aa), fused to N-terminal His tag, was expressed in E. coli.                            |
| <b>Species</b>          | Mouse                                                                                                                                                                          |
| <b>Source</b>           | E.coli                                                                                                                                                                         |
| <b>ProteinLength</b>    | Full Length (1-162)                                                                                                                                                            |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                             |
| <b>AA Sequence</b>      | MLQTGNYSVLVSLQFLLLSYDLFVNSFSELLRMAPVIQLVLFIIQDIAILFNIIIIIFLMF FN<br>TFVFQAGLVNLLFHKFKGTIILTSVYLALSISLHVWVMNVRWKNSSSFWSWTNGLQTLF<br>VFQRLAAVLYCYFYKRTAVRLGDPFRFYQDSLWLRKEFMQVRR |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                    |
| <b>Applications</b>     | SDS-PAGE                                                                                                                                                                       |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                            |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                 |

|                       |                                             |
|-----------------------|---------------------------------------------|
| <b>Storage Buffer</b> | Tris/PBS-based buffer, 6% Trehalose, pH 8.0 |
|-----------------------|---------------------------------------------|

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION**

|                  |         |
|------------------|---------|
| <b>Gene Name</b> | Tmem138 |
|------------------|---------|

|                 |                                    |
|-----------------|------------------------------------|
| <b>Synonyms</b> | Tmem138; Transmembrane protein 138 |
|-----------------|------------------------------------|

|                   |                        |
