

## Recombinant Human SLAMF6, Fc tagged

**Cat. No.** SLAMF6-269H    **Lot. No.** (See product label)

### SPECIFICATION

|                             |                                                                                                                                                                                                                                                                 |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b>     | Recombinant Human SLAMF6 (Q96DU3-1) (Met1-Met226), fused with the Fc region of human IgG1 at the C-terminus, was produced in Human Cells.                                                                                                                       |
| <b>Species</b>              | Human                                                                                                                                                                                                                                                           |
| <b>Source</b>               | Human Cells                                                                                                                                                                                                                                                     |
| <b>ProteinLength</b>        | 1-226 a.a.                                                                                                                                                                                                                                                      |
| <b>Predicted N Terminal</b> | Gln 22                                                                                                                                                                                                                                                          |
| <b>Form</b>                 | Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose and mannitol are added as protectants before lyophilization.                                                                                                                                 |
| <b>Molecular Mass</b>       | The recombinant human SLAMF6/Fc is a disulfide-linked homodimer. The reduced monomer comprises 446 amino acids and has a predicted molecular mass of 50.1 kDa. The apparent molecular mass of the protein is approximately 63-68 kDa in SDS-PAGE under reducing |
| <b>Endotoxin</b>            | < 1.0 eu per µg of the protein as determined by the LAL method.                                                                                                                                                                                                 |
| <b>Purity</b>               | (97.5+1.3) % as determined by SDS-PAGE                                                                                                                                                                                                                          |
| <b>Stability</b>            | Samples are stable for up to twelve months from date of receipt at -70oC.                                                                                                                                                                                       |

**Storage**

Store it under sterile conditions at -20oC~-70oC. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

**Reconstitution**

It is recommended that sterile water be added to the vial to prepare a stock solution. Centrifuge the vial at 4°C before opening to recover the entire contents.

**GENE INFORMATION**
**Gene Name**

SLAMF6 SLAM family member 6 [ Homo sapiens ]

**Official Symbol**

SLAMF6

**Gene ID**

114836

**mRNA Refseq**

NM\_001184714

**Protein Refseq**

NP\_001171643

**MIM**

606446

**UniProt ID**

Q96DU3

**Chromosome  
Location**

1q23.1
