

# Recombinant Full Length Escherichia Coli Inner Membrane Protein Ynjf(Ynjf) Protein, His-Tagged

**Cat. No.** RFL31480EF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                              |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Escherichia coli Inner membrane protein YnjF(ynjF) Protein (P76226) (1-206aa), fused to N-terminal His tag, was expressed in E. coli.                                                                |
| <b>Species</b>          | E.coli                                                                                                                                                                                                                       |
| <b>Source</b>           | E.coli                                                                                                                                                                                                                       |
| <b>ProteinLength</b>    | Full Length (1-206)                                                                                                                                                                                                          |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                                           |
| <b>AA Sequence</b>      | MLDRHLHPRIKPLLHQCVRLDKPGITPDGLTLVGFAIGVLALPFLALGWYLAALVVIL<br>L NRLLDGLDGALARRRELTDAGGFLLDISLDFLYALVPFGFILAAPEQNALAGGWLLF<br>AFI GTGSSFLAFAALAAKHQIDNPGYAHKSFYLLGGLTEGTETILLFVLGCLFPAWFA<br>WFAWI FGALCWMTTFTRVWVSGYLTLSLQRQ |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                                  |
| <b>Applications</b>     | SDS-PAGE                                                                                                                                                                                                                     |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                                          |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                                            |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION****Gene Name**

ynjF

**Synonyms**

ynjF; b1758; JW1747; Inner membrane protein YnjF

**UniProt ID**
