

# Recombinant Full Length *Saccharomyces Cerevisiae* Putative Uncharacterized Membrane Protein Yar047C (Yar047C) Protein, His-Tagged

**Cat. No.** RFL9893SF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length <i>Saccharomyces cerevisiae</i> Putative uncharacterized membrane protein YAR047C (YAR047C) Protein (P39557) (1-106aa), fused to N-terminal His tag, was expressed in <i>E. coli</i> . |
| <b>Species</b>          | <i>S.cerevisiae</i>                                                                                                                                                                                            |
| <b>Source</b>           | <i>E.coli</i>                                                                                                                                                                                                  |
| <b>ProteinLength</b>    | Full Length (1-106)                                                                                                                                                                                            |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                             |
| <b>AA Sequence</b>      | MYQTSPLSLFYFQVLVPKFLECFPCPYHKISLVALLSFFYCQLQTNMIILLSQIKRFLY<br>RQIMIALKIKAKKFWFIFKYFNVSCDARLFNELFYIFQTYVSVDSK                                                                                                  |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                                    |
| <b>Applications</b>     | SDS-PAGE                                                                                                                                                                                                       |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                            |
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid                                                                                                                              |

repeated freeze-thaw cycles.

**Storage Buffer**

Tris/PBS-based buffer, 6% Trehalose, pH 8.0

**Reconstitution**

We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference.

**GENE INFORMATION****Gene Name**

YAR047C

**Synonyms**

YAR047C; Putative uncharacterized membrane protein YAR047C

**UniProt ID**

[P39557](#)
