

# Recombinant Full Length Saccharomyces Cerevisiae Altered Inheritance Of Mitochondria Protein 26, Mitochondrial(Aim26) Protein, His-Tagged

**Cat. No.** RFL2557SF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                          |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Recombinant Full Length Saccharomyces cerevisiae Altered inheritance of mitochondria protein 26, mitochondrial(AIM26) Protein (P32858) (1-118aa), fused to N-terminal His tag, was expressed in E. coli. |
| <b>Species</b>          | S.cerevisiae                                                                                                                                                                                             |
| <b>Source</b>           | E.coli                                                                                                                                                                                                   |
| <b>ProteinLength</b>    | Full Length (1-118)                                                                                                                                                                                      |
| <b>Form</b>             | Lyophilized powder                                                                                                                                                                                       |
| <b>AA Sequence</b>      | MQTMGGEHLLLSQLKGSFFLLLLAYFFRGRSPYYARCYRRLAVTPGAITIAIAIATDSI<br>P ALAKSKVLVSVCSHTDPCTASCNLIPFPRPFSNSLTRFLFCLGSARFCISFPCFGLS<br>I                                                                          |
| <b>Purity</b>           | Greater than 90% as determined by SDS-PAGE.                                                                                                                                                              |
| <b>Applications</b>     | SDS-PAGE                                                                                                                                                                                                 |
| <b>Notes</b>            | Repeated freezing and thawing is not recommended. Store working aliquots at 4°C for up to one week.                                                                                                      |

|                         |                                                                                                                                                                                                                                                                                                                                                                                                             |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Storage</b>          | Store at -20°C/-80°C upon receipt, aliquoting is necessary for mutiple use. Avoid repeated freeze-thaw cycles.                                                                                                                                                                                                                                                                                              |
| <b>Storage Buffer</b>   | Tris/PBS-based buffer, 6% Trehalose, pH 8.0                                                                                                                                                                                                                                                                                                                                                                 |
| <b>Reconstitution</b>   | We recommend that this vial be briefly centrifuged prior to opening to bring the contents to the bottom. Please reconstitute protein in deionized sterile water to a concentration of 0.1-1.0 mg/mL. We recommend to add 5-50% of glycerol (final concentration) and aliquot for long-term storage at -20°C/-80°C. Our default final concentration of glycerol is 50%. Customers could use it as reference. |
| <b>GENE INFORMATION</b> |                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Gene Name</b>        | AIM26                                                                                                                                                                                                                                                                                                                                                                                                       |
