

## Recombinant Rat Cdh8, LEVLFQ tagged

**Cat. No.** Cdh8-24R    **Lot. No.** (See product label)

### SPECIFICATION

|                             |                                                                                                                                                                                                                                             |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b>     | Recombinant Rat Cdh8 (NP_445845.2) (Met1-Met621), fused with six amino acids (LEVLFQ) at the C-terminus, was produced in Human Cells.                                                                                                       |
| <b>Species</b>              | Rat                                                                                                                                                                                                                                         |
| <b>Source</b>               | Human Cells                                                                                                                                                                                                                                 |
| <b>ProteinLength</b>        | 1-621 a.a.                                                                                                                                                                                                                                  |
| <b>Predicted N Terminal</b> | Ala 30                                                                                                                                                                                                                                      |
| <b>Form</b>                 | Lyophilized from sterile PBS, pH 7.4. Normally 5 % - 8 % trehalose and mannitol are added as protectants before lyophilization.                                                                                                             |
| <b>Molecular Mass</b>       | The recombinant rat CDH8 comprises 599 amino acids and predicts a molecular mass of 65.9 kDa. The apparent molecular mass of the recombinant protein is approximately 76-85 kDa in SDS-PAGE under reducing conditions due to glycosylation. |
| <b>Endotoxin</b>            | < 1.0 eu per µg of the protein as determined by the LAL method.                                                                                                                                                                             |
| <b>Purity</b>               | >80 % as determined by SDS-PAGE                                                                                                                                                                                                             |
| <b>Stability</b>            | Samples are stable for up to twelve months from date of receipt at -70oC.                                                                                                                                                                   |

**Storage**

Store it under sterile conditions at -20oC~-70oC. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

**Reconstitution**

It is recommended that sterile water be added to the vial to prepare a stock solution. Centrifuge the vial at 4°C before opening to recover the entire contents.

**GENE INFORMATION****Gene Name**

Cdh8 cadherin 8 [ *Rattus norvegicus* ]

**Official Symbol**

Cdh8

**Gene ID**

84408

**mRNA Refseq**

NM\_053393

**Protein Refseq**

NP\_445845
