

## Recombinant Norovirus GI.2 VLP Protein

**Cat. No.** VLP-01N    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                                                                                     |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Norovirus GI.2 Virus-like Particle (VLP) protein is a recombinant protein, The silkworm was infected by a recombinant Baculovirus harboring the Norovirus GI.2 VLP. |
| <b>Species</b>          | Norovirus GI.2                                                                                                                                                      |
| <b>Source</b>           | Insect Cells                                                                                                                                                        |
| <b>Description</b>      | Noroviruses are a group of related viruses. Infection with these viruses causes an illness called gastroenteritis, an inflammation of the stomach and intestines.   |
| <b>Form</b>             | Liquid                                                                                                                                                              |
| <b>Molecular Mass</b>   | 58.7kDa                                                                                                                                                             |
| <b>Purity</b>           | >90% pure by SDS-PAGE                                                                                                                                               |
| <b>Applications</b>     | SDS-PAGE                                                                                                                                                            |
| <b>Notes</b>            | FOR RESEARCH USE ONLY. Not for human consumption, cosmetic, therapeutic for diagnostic use.                                                                         |
| <b>Storage</b>          | Store at -80 centigrade. Avoid freeze/thaw cycle.                                                                                                                   |
| <b>Concentration</b>    | 0.76 mg/mL (BSA standard)                                                                                                                                           |

 45-1 Ramsey Road, Shirley, NY 11967, USA

**Storage Buffer** Phosphate Buffered Saline, pH 7.4

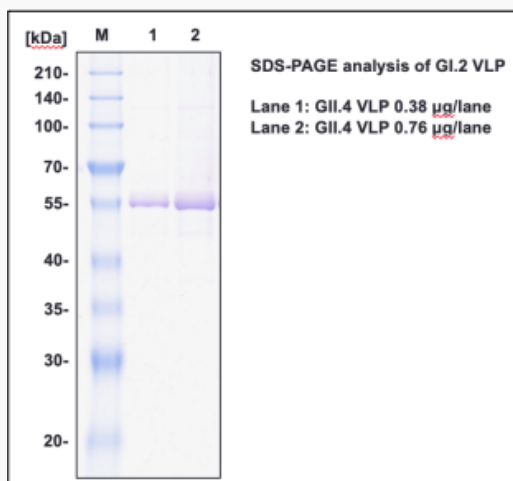

## GENE INFORMATION

**Official Symbol** Norovirus GI.2 VLP

**Synonyms** Norovirus GI.2 VLP

**UniProt ID** [Q04542](#)
