

Recombinant Human TIGIT Protein

Cat. No. TIGIT-23H Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant Human TIGIT Protein was expressed in E. coli.
Species	Human
Source	E.coli
Description	This gene encodes a member of the PVR (poliovirus receptor) family of immunoglobulin proteins. The product of this gene is expressed on several classes of T cells including follicular B helper T cells (TFH). The protein has been shown to bind PVR with high affinity; this binding is thought to assist interactions between TFH and dendritic cells to regulate T cell dependent B cell responses.
