

Recombinant Human TBX21 Protein, His-tagged

Cat. No. TBX21-79H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human TBX21 Protein, fused to His-tag, was expressed in E. coli.
Species	Human
Source	E.coli
Description	This gene is a member of a phylogenetically conserved family of genes that share a common DNA-binding domain, the T-box. T-box genes encode transcription factors involved in the regulation of developmental processes. This gene is the human ortholog of mouse Tbx21/Tbet gene. Studies in mouse show that Tbx21 protein is a Th1 cell-specific transcription factor that controls the expression of the hallmark Th1 cytokine, interferon-gamma (IFNG). Expression of the human ortholog also correlates with IFNG expression in Th1 and natural killer cells, suggesting a role for this gene in initiating Th1 lineage development from naive Th precursor cells.
