

## Native Escherichia coli Lipopolysaccharides

**Cat. No.** LIPO-02E    **Lot. No.** (See product label)

### SPECIFICATION

|                         |                                                                                                 |
|-------------------------|-------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Native Escherichia coli LIPO protein, was extracted in Escherichia coli O55:B5                  |
| <b>Species</b>          | E.coli                                                                                          |
| <b>Source</b>           | E.coli                                                                                          |
| <b>Description</b>      | Lipopolysaccharides (LPSs) consist of a lipid A moiety linked to an antigenic O-polysaccharide. |
| <b>Form</b>             | Lyophilized powder                                                                              |
| <b>Purity</b>           | Impurities<3% Protein (Lowry)                                                                   |
| <b>Applications</b>     | Laboratory chemicals, Manufacture of substances                                                 |
| <b>Storage</b>          | 2-8°C                                                                                           |
| <b>Shipping</b>         | Ambient                                                                                         |
