Recombinant Full Length Human CD82 Protein

Cat. No. CD82-67HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human CD82 with N terminal proprietary tag; Predicted MWt 55.11 kDa.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	267 amino acids
Description	This metastasis suppressor gene product is a membrane glycoprotein that is a member of the transmembrane 4 superfamily. Expression of this gene has been shown to be downregulated in tumor progression of human cancers and can be activated by p53 through a consensus binding sequence in the promoter. Its expression and that of p53 are strongly correlated, and the loss of expression of these two proteins is associated with poor survival for prostate cancer patients. Two alternatively spliced transcript variants encoding distinct isoforms have been found for this gene.
