

Recombinant Full Length Human DSG1 Protein

Cat. No. DSG1-144HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human Desmoglein 1 with N terminal proprietary tag; Predicted MWt 142.39 kDa inclusive of tag.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	1049 amino acids
Description	Desmosomes are cell-cell junctions between epithelial, myocardial and certain other cell types. Desmoglein 1 is a calcium-binding transmembrane glycoprotein component of desmosomes in vertebrate epithelial cells. Currently, three desmoglein subfamily members have been identified and all are members of the cadherin cell adhesion molecule superfamily. These desmoglein gene family members are located in a cluster on chromosome 18. The protein encoded by this gene has been identified as the autoantigen of the autoimmune skin blistering disease pemphigus foliaceus.
