

Recombinant Full Length Human GALNS Protein, GST-tagged

Cat. No. GALNS-177HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human full-length GALNS (1 a.a. - 522 a.a.), fused with GST-tag at N-terminal, was expressed in wheat germ.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	1 a.a. - 522 a.a.
Description	This gene encodes N-acetylgalactosamine-6-sulfatase which is a lysosomal exohydro lase required for the degradation of the glycosaminoglycans, keratan sulfate, and cho ndroitin 6-sulfate. Sequence alterations including point, missense and nonsense muta tions, as well as those that affect splicing, result in a deficiency of this enzyme. Defici encies of this enzyme lead to Morquio A syndrome, a lysosomal storage disorder.
Molecular Mass	84.4 kDa
