

Recombinant Human ACSS3, His-tagged

Cat. No. ACSS3-18H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human Acyl-CoA Synthetase Short-Chain Family Member 3 Mitochondrial/ACSS3 is produced by our mammalian expression system in human cells. The target protein is expressed with sequence (Ala30-Ala686) of Human ACSS3 fused with a polyhistidine tag at the C-terminus.
Species	Human
Source	HEK293
ProteinLength	30-686 a.a.
Description	Acyl-CoA Synthetase Short-Chain Family Member 3 Mitochondrial (ACSS3) is a member of the ATP-dependent AMP-binding enzyme family. ACSS3 localizes to the mitochondrion and catalyzes acetate and CoA into diphosphate and acetyl-CoA using the ATP. ACSS3 activates acetate for lipid synthesis use or for energy generation. Two isoforms of the human protein are produced by alternative splicing.
