

Recombinant Full Length Human P4HA1 Protein

Cat. No. P4HA1-355HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human P4HA1 with a N terminal proprietary tag; Predicted MWt 84.81 kDa including the tag.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	534 amino acids
Description	This gene encodes a component of prolyl 4-hydroxylase, a key enzyme in collagen synthesis composed of two identical alpha subunits and two beta subunits. The encoded protein is one of several different types of alpha subunits and provides the major part of the catalytic site of the active enzyme. In collagen and related proteins, prolyl 4-hydroxylase catalyzes the formation of 4-hydroxyproline that is essential to the proper three-dimensional folding of newly synthesized procollagen chains. Alternatively spliced transcript variants encoding different isoforms have been described.
Form	Liquid
Molecular Mass	84.810kDa inclusive of tags
