

Recombinant Full Length Human PDZK1 Protein

Cat. No. PDZK1-368HF Lot. No. (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human PDZK1 with N terminal proprietary tag; Predicted MWt 83.2 kDa.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	519 amino acids
Description	<p>This gene encodes a PDZ domain-containing scaffolding protein. PDZ domain-containing molecules bind to and mediate the subcellular localization of target proteins. The encoded protein mediates the localization of cell surface proteins and plays a critical role in cholesterol metabolism by regulating the HDL receptor, scavenger receptor class B type 1. Single nucleotide polymorphisms in this gene may be associated with metabolic syndrome, and overexpression of this gene may play a role in drug resistance of multiple myeloma. Pseudogenes of this gene are located on the long arm of chromosome 1. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene.</p>
