

Recombinant Full Length Human PTGDR Protein

Cat. No. PTGDR-411HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human Prostaglandin D2 Receptor with N terminal proprietary tag. Predicted MW 65.60 kDa.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	359 amino acids
Description	The protein encoded by this gene is a G-protein-coupled receptor. It has been shown to function as a prostanoid DP receptor. The activity of this receptor is mainly mediated by G-S proteins that stimulate adenylate cyclase resulting in an elevation of intracellular cAMP and Ca ²⁺ . Knockout studies in mice suggest that the ligand of this receptor, prostaglandin D2 (PGD ₂), functions as a mast cell-derived mediator to trigger asthmatic responses.
