

Recombinant Full Length Human PRRX1 Protein

Cat. No. PRRX1-427HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human PRRX1, isoform PMX1-A with N terminal proprietary tag; Predicted MWt 49.94 kDa.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	217 amino acids
Description	The DNA-associated protein encoded by this gene is a member of the paired family of homeobox proteins localized to the nucleus. The protein functions as a transcription co-activator, enhancing the DNA-binding activity of serum response factor, a protein required for the induction of genes by growth and differentiation factors. The protein regulates muscle creatine kinase, indicating a role in the establishment of diverse mesodermal muscle types. Alternative splicing yields two isoforms that differ in abundance and expression patterns.
