

Recombinant Human ART5, His-tagged

Cat. No. ART5-33H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human Ecto-ADP-Ribosyltransferase 5/ART5 is produced by our mammalian expression system in human cells. The target protein is expressed with sequence (Met1-Pro291) of Human ART5 fused with a polyhistidine tag at the C-terminus.
Species	Human
Source	HEK293
ProteinLength	1-291 a.a.
Description	Ecto-ADP-Ribosyltransferase 5 (ART5) is a member of the ARG-specific ADP-ribosyltransferase family. Members of this family regulate the function of target proteins by attaching ADP-ribose to specific amino acid residues in their target proteins. ART5 is a secreted protein and contains four NAD binding sites. ART5 proposes to regulate the endocytosis of plasma membrane proteins by recruiting the ubiquitin ligase Rsp5p to its target in the plasma membrane.
