

Recombinant Full Length Human PSAP Protein, GST-tagged

Cat. No. PSAP-611HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full length Human PSAP(18 a.a. - 524 a.a.) fused with GST tag at N-terminal was expressed in Wheat Germ.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	524 amino acids
Description	This gene encodes a highly conserved glycoprotein which is a precursor for 4 cleavage products: saposins A, B, C, and D. Each domain of the precursor protein is approximately 80 amino acid residues long with nearly identical placement of cysteine residues and glycosylation sites. Saposins A-D localize primarily to the lysosomal compartment where they facilitate the catabolism of glycosphingolipids with short oligosaccharide groups. The precursor protein exists both as a secretory protein and as an integral membrane protein and has neurotrophic activities. Mutations in this gene have been associated with Gaucher disease, Tay-Sachs disease, and metachromatic leukodystrophy. Alternative splicing results in multiple transcript variants encoding different isoforms.
Form	50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.
Molecular Mass	81.29 kDa
AA Sequence	PVLGLKECTR GSAVWCQNVK TASDCGAVKH CLQTVWNKPT VKSLPCDICK

Applications

Enzyme-linked Immunoabsorbent Assay; Western Blot (Recombinant protein);
 Antibody Production; Protein Array

Storage

Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.

GENE INFORMATION

Gene Name

PSAP prosaposin [Homo sapiens]

Official Symbol

PSAP

Synonyms

PSAP; prosaposin; GLBA, SAP1, sphingolipid activator protein 1; proactivator
 polypeptide; variant Gaucher disease and variant metachromatic leukodystrophy;
 sphingolipid activator protein-1; GLBA; SAP1; FLJ00245; MGC110993

Gene ID

5660

mRNA Refseq

NM_002778

Protein Refseq

NP_002769
