

Recombinant Full Length Human ABT1 Protein, GST-tagged

Cat. No. ABT1-867HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human ABT1 full-length ORF (AAH48812, 1 a.a. - 272 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	272 amino acids
Description	Basal transcription of genes by RNA polymerase II requires the interaction of TATA-binding protein (TBP) with the core region of class II promoters. Studies in mouse suggest that the protein encoded by this gene likely activates basal transcription from class II promoters by interaction with TBP and the class II promoter DNA.
