

Recombinant Full Length Human ADAM32 Protein, GST-tagged

Cat. No. ADAM32-886HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human ADAM32 full-length ORF (AAH26169.1, 1 a.a. - 787 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	787 amino acids
Description	This gene encodes a member of the disintegrin family of membrane-anchored proteins that play a role in diverse biological processes such as brain development, fertilization, tumor development and inflammation. This gene is predominantly expressed in the testis. The encoded protein undergoes proteolytic processing to generate a mature polypeptide comprised of an metalloprotease, disintegrin and epidermal growth factor-like domains. This gene is located in a cluster of other disintegrin and metallopeptidase family genes on chromosome 8. Alternative splicing results in multiple transcript variants encoding different isoforms. [provided by RefSeq, Sep 2015]
Molecular Mass	114.3 kDa

Applications	Enzyme-linked Immunoabsorbent Assay Western Blot (Recombinant protein) Antibody Production Protein Array
Storage	Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.
Storage Buffer	50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

GENE INFORMATION

Gene Name	ADAM32 ADAM metalloproteinase domain 32 [Homo sapiens]
Official Symbol	ADAM32
Synonyms	ADAM32; ADAM metalloproteinase domain 32; a disintegrin and metalloproteinase
