

Recombinant Full Length Human APBA1 Protein, GST-tagged

Cat. No. APBA1-1077HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human APBA1 full-length ORF (AAI56048.1, 1 a.a. - 837 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	837 amino acids
Description	The protein encoded by this gene is a member of the X11 protein family. It is a neuronal adapter protein that interacts with the Alzheimer's disease amyloid precursor protein (APP). It stabilizes APP and inhibits production of proteolytic APP fragments including the A beta peptide that is deposited in the brains of Alzheimer's disease patients. This gene product is believed to be involved in signal transduction processes. It is also regarded as a putative vesicular trafficking protein in the brain that can form a complex with the potential to couple synaptic vesicle exocytosis to neuronal cell adhesion. [provided by RefSeq, Jul 2008]
Molecular Mass	92.1 kDa

Applications

Enzyme-linked Immunoabsorbent Assay; Western Blot (Recombinant protein);
 Antibody Production; Protein Array

Storage

Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.

Storage Buffer

50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

GENE INFORMATION

Gene Name

APBA1 amyloid beta (A4) precursor protein-binding, family A, member 1 [Homo sapiens]

Official Symbol

APBA1

Synonyms

APBA1; amyloid beta (A4) precursor protein-binding, family A, member 1; MINT1;
 amyloid beta A4 precursor protein-binding family A member 1; D9S411E; X11; mint-1;
 adapter protein X11alpha; adaptor protein X11alpha; neuron-specific X11 protein;
