

Recombinant Full Length Human APBB3 Protein, GST-tagged

Cat. No. APBB3-1119HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human APBB3 full-length ORF (AAH13158, 1 a.a. - 486 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	486 amino acids
Description	The protein encoded by this gene is a member of the APBB protein family. It is found in the cytoplasm and binds to the intracellular domain of the Alzheimer's disease beta-amyloid precursor protein (APP) as well as to other APP-like proteins. It is thought that the protein encoded by this gene may modulate the internalization of APP. Multiple transcript variants encoding several different isoforms have been found for this gene.
