

Recombinant Full Length Human ARHGAP26 Protein, GST-tagged

Cat. No. ARHGAP26-1193HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human ARHGAP26 full-length ORF (AAH68555.1, 1 a.a. - 759 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	759 amino acids
Description	Interaction of a cell with the extracellular matrix triggers integrin cell surface receptors to begin signaling cascades that regulate the organization of the actin-cytoskeleton. One of the proteins involved in these cascades is focal adhesion kinase. The protein encoded by this gene is a GTPase activating protein that binds to focal adhesion kinase and mediates the activity of the GTP binding proteins RhoA and Cdc42. Defects in this gene are a cause of juvenile myelomonocytic leukemia (JMML). Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Mar 2017]
Molecular Mass	112.6 kDa

Applications

Enzyme-linked Immunoabsorbent Assay; Western Blot (Recombinant protein);
 Antibody Production; Protein Array

Storage

Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.

Storage Buffer

50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

GENE INFORMATION

Gene Name

ARHGAP26 Rho GTPase activating protein 26 [Homo sapiens]

Official Symbol

ARHGAP26

Synonyms

ARHGAP26; Rho GTPase activating protein 26; rho GTPase-activating protein 26;
 GRAF; GTPase regulator associated with the focal adhesion kinase pp125;
 KIAA0621; OPHN1L; OPHN1L1; oligophrenin-1-like protein; GTPase regulator
 associated with focal adhesion kinase pp125(FAK); GRAF1; FLJ42530
