

Recombinant Full Length Human ATP4A Protein

Cat. No. ATP4A-1297HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human ATP4A full-length ORF (AAI67780.1) recombinant protein without tag.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	1035 amino acids
Description	The protein encoded by this gene belongs to a family of P-type cation-transporting ATPases. The gastric H⁺, K⁺-ATPase is a heterodimer consisting of a high molecular weight catalytic alpha subunit and a smaller but heavily glycosylated beta subunit. This enzyme is a proton pump that catalyzes the hydrolysis of ATP coupled with the exchange of H⁽⁺⁾ and K⁽⁺⁾ ions across the plasma membrane. It is also responsible for gastric acid secretion. This gene encodes a catalytic alpha subunit of the gastric H⁺, K⁺-ATPase. [provided by RefSeq, Jul 2008]
Form	Liquid
Molecular Mass	113.9 kDa

Applications Antibody Production; Functional Study; Compound Screening

Storage Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.

Storage Buffer 25 mM Tris-HCl of pH8.0 containing 2% glycerol.

GENE INFORMATION

Gene Name [ATP4A ATPase, H+/K+ exchanging, alpha polypeptide \[Homo sapiens \]](#)

Official Symbol [ATP4A](#)

Synonyms ATP6A
