

Recombinant Human LIPH, His-tagged

Cat. No. LIPH-127H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human Lipase Member H/LIPH is produced by our mammalian expression system in human cells. The target protein is expressed with sequence (Glu19-Leu451) of Human LIPH fused with a polyhistidine tag at the C-terminus.
Species	Human
Source	HEK293
ProteinLength	19-451 a.a.
Description	Lipase Member H (LIPH) is a secreted protein that is a member of the Lipase family of AB hydrolase superfamily. LIPH catalyzes the production of 2-acyl lysophosphatidic acid (LPA), which is a lipid mediator with diverse biological properties that include platelet aggregation, smooth muscle contraction, and stimulation of cell proliferation and motility. However, LIPH does not hydrolyze other phospholipids, like phosphatidylserine (PS), phosphatidylcholine (PC) and phosphatidylethanolamine (PE) or triacylglycerol (TG).
