

Recombinant Full Length Human NOX4 Protein

Cat. No. NOX4-1539HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant full-length Human NOX4 was expressed in Wheat Germ.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	578 amino acids
Description	This gene encodes a member of the NOX-family of enzymes that functions as the catalytic subunit the NADPH oxidase complex. The encoded protein is localized to non-phagocytic cells where it acts as an oxygen sensor and catalyzes the reduction of molecular oxygen to various reactive oxygen species (ROS). The ROS generated by this protein have been implicated in numerous biological functions including signal transduction, cell differentiation and tumor cell growth. A pseudogene has been identified on the other arm of chromosome 11. Alternative splicing results in multiple transcript variants.
Form	25 mM Tris-HCl of pH8.0 containing 2% glycerol.
Molecular Mass	63.6 kDa
