

Recombinant Human MUC15, His-tagged

Cat. No. MUC15-149H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human Mucin-15/MUC15 is produced by our mammalian expression system in human cells. The target protein is expressed with sequence (Lys24-Thr236) of Human MUC15 fused with a 6His tag at the C-terminus.
Species	Human
Source	HEK293
ProteinLength	24-236 a.a.
Description	Mucin-15 is a single-pass type I membrane protein member of the Mucin family. Mucins are a family of high molecular weight, heavily glycosylated proteins (glycoconjugates) produced by epithelial tissues in most metazoans. A key characteristic of Mucins is their ability to form gels. Therefore they are a key component in most gel-like secretions, serving functions from lubrication to cell signalling to forming chemical barriers. Mucin-15 is expressed in many tissues. Mucin-15 is highly glycosylated (N- and O-linked carbohydrates). Mucin-15 may play a role in the cell adhesion to the extracellular matrix.
