

Recombinant Human NEU1, His-tagged

Cat. No. NEU1-156H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human Sialidase-1 is produced by our mammalian expression system in human cells. The target protein is expressed with sequence (Glu48-Leu415) of Human NEU1 fused with a 6His tag at the C-terminus.
Species	Human
Source	HEK293
Description	Sialidase-1 belongs to the N-acetyl-a neuraminidase family. Sialidase-1 is expressed in many tissues; it is highly expressed in the pancreas, and weakly expressed in the brain. Sialidase-1 is a lysosomal enzyme, which cleaves terminal sialic acid residues from substrates such as glycoproteins and glycolipids. Deficiencies in the human enzyme Sialidase-1 leads to sialidosis, a rare lysosomal storage disease. Sialidase-1 has been shown to interact with Cathepsin A (protective protein), β -galactosidase and N-acetylgalactosamine-6-sulfate sulfatase in a multienzyme complex.
