

Recombinant Human PPM1K, His-tagged

Cat. No. PPM1K-174H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant Human Protein Phosphatase 1K Mitochondrial/PPM1K is produced by our mammalian expression system in human cells. The target protein is expressed with sequence (Asp30-Ala372) of Human PPM1K fused with a polyhistidine tag at the C-terminus.
Species	Human
Source	HEK293
ProteinLength	30-372 a.a.
Description	Protein Phosphatase 1K Mitochondrial (PPM1K) is a member of the PP2C family. PPM1K localizes to the cell mitochondrion matrix and contains one PP2C-like domain. PPM1K has metal ion binding and protein serine/threonine phosphatase activity. One subunit of PPM1K can bind one magnesium or manganese ion. PPM1K regulates the mitochondrial permeability transition pore and it is essential for cellular survival and development.
