

# Recombinant Full Length Human POU2AF2 Protein, GST-tagged

**Cat. No.** POU2AF2-1826HF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                             |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Human POU2AF2 full-length ORF ( NP_940900.1, 1 a.a. - 236 a.a.) recombinant protein with GST-tag at N-terminal.                                                                                                                                             |
| <b>Species</b>          | Human                                                                                                                                                                                                                                                       |
| <b>Source</b>           | In Vitro Cell Free System                                                                                                                                                                                                                                   |
| <b>ProteinLength</b>    | 236 amino acids                                                                                                                                                                                                                                             |
| <b>Description</b>      | POU2AF2 (POU Class 2 Homeobox Associating Factor 2) is a Protein Coding gene.                                                                                                                                                                               |
| <b>Form</b>             | 50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.                                                                                                                                                                                    |
| <b>Molecular Mass</b>   | 51.8 kDa                                                                                                                                                                                                                                                    |
| <b>AA Sequence</b>      | MPGSPVTSGYYGVRRSFLSDSDFHNSKQFSNDVYTSSVGKPFPCCESSAGQSHAAL<br>LEPYFPQEPYGDYRPPALTPNAGSLFSASPLPPLLPPFPDPAHFLFRDSWEQTLTLP<br>DGLSQPDPVSADALLTLPSTSCLSQLESGSIAQHRGSSWGSSLAGAQSYSYLAHLE<br>DLHHTPGYPTPPYPFTPFMTVSNLPPKVGPLSPDEEADTGSLHDPSPWVKEDGS<br>IAWGSYECRRAY |
| <b>Storage</b>          | Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.                                                                                                                                                                                    |
| <b>Storage Buffer</b>   | 50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.                                                                                                                                                                                    |
