Recombinant Full Length Human CLCA4 Protein

Cat. No. CLCA4-1872HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human CLCA4 full-length ORF (ADR83285.1) recombinant protein without tag.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	919 amino acids
Description	The protein encoded by this gene belongs to the calcium sensitive chloride conductance protein family. To date, all members of this gene family map to the same site on chromosome 1p31-p22 and share high degrees of homology in size, sequence and predicted structure, but differ significantly in their tissue distributions. Alternative splicing results in multiple transcript variants, only one of which is thought to be protein coding. [provided by RefSeq, Dec 2008]
