

Recombinant Full Length Human CLSTN1 Protein, GST-tagged

Cat. No. CLSTN1-1890HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human CLSTN1 full-length ORF (AAH33902.1, 1 a.a. - 971 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	971 amino acids
Description	This gene is a member of the calsynenin family, a subset of the cadherin superfamily. The encoded transmembrane protein, also known as alcadein-alpha, is thought to bind to kinesin-1 motors to mediate the axonal anterograde transport of certain types of vesicle. Amyloid precursor protein (APP) is trafficked via these vesicles and so this protein is being investigated to see how it might contribute to the mechanisms underlying Alzheimer's disease. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Nov 2014]
