

Recombinant Full Length Human CLCN1 Protein, GST-tagged

Cat. No. CLCN1-1965HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human CLCN1 full-length ORF (AAI11587.1, 1 a.a. - 988 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	988 amino acids
Description	The CLCN family of voltage-dependent chloride channel genes comprises nine members (CLCN1-7, Ka and Kb) which demonstrate quite diverse functional characteristics while sharing significant sequence homology. The protein encoded by this gene regulates the electric excitability of the skeletal muscle membrane. Mutations in this gene cause two forms of inherited human muscle disorders: recessive generalized myotonia congenita (Becker) and dominant myotonia (Thomsen). Alternative splicing results in multiple transcript variants. [provided by RefSeq, Mar 2012]
