

Recombinant Full Length Human CLEC12A Protein

Cat. No. CLEC12A-2115HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human CLEC12A full-length ORF (ADR82900.1) recombinant protein without tag.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	265 amino acids
Description	This gene encodes a member of the C-type lectin/C-type lectin-like domain (CTL/CTLD) superfamily. Members of this family share a common protein fold and have diverse functions, such as cell adhesion, cell-cell signaling, glycoprotein turnover, and roles in inflammation and immune response. The protein encoded by this gene is a negative regulator of granulocyte and monocyte function. Several alternatively spliced transcript variants of this gene have been described, but the full-length nature of some of these variants has not been determined. This gene is closely linked to other CTL/CTLD superfamily members in the natural killer gene complex region on chromosome 12p13. [provided by RefSeq, May 2011]
