

Recombinant Full Length Human CRYBB3 Protein, GST-tagged

Cat. No. CRYBB3-2140HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human CRYBB3 full-length ORF (AAI02022.1, 1 a.a. - 211 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	211 amino acids
Description	Crystallins are separated into two classes: taxon-specific, or enzyme, and ubiquitous. The latter class constitutes the major proteins of vertebrate eye lens and maintains the transparency and refractive index of the lens. Since lens central fiber cells lose their nuclei during development, these crystallins are made and then retained throughout life, making them extremely stable proteins. Mammalian lens crystallins are divided into alpha, beta, and gamma families; beta and gamma crystallins are also considered as a superfamily. Alpha and beta families are further divided into acidic and basic groups. Seven protein regions exist in crystallins: four homologous motifs, a connecting peptide, and N- and C-terminal extensions. Beta-crystallins, the most heterogeneous, differ by the presence of the C-terminal extension (present in the basic group, none in the acidic group). Beta-crystallins form aggregates of different sizes and are able to self-associate to form dimers or to form heterodimers with other beta-crystallins. This gene, a beta basic group member, is part of a gene cluster with beta-A4, beta-B1, and beta-B2. Mutations in this gene result in cataract

	congenital nuclear autosomal recessive type 2. [provided by RefSeq, Feb 2013]
Molecular Mass	50.6 kDa
AA Sequence	MAEQHGAPEQAAAGKSHGDLGGSYKVILYELENFQGKRCELSAECPSLTDSLLEKV GSIQVESGPWLAFESRAFRGEQFVLEKGDYPRWDAWSNSRSDSLLSLQPLNIDSP DHKLHLFENPAFSGRKMEIVDDDVPSLWAHGFQDRVASVRAINGTWVGYEFPGYR GRQYVFERGEYRHWNEWDASQPQLQSVRRIRDQKWHKRGRFPSS
Applications	Enzyme-linked Immunoabsorbent Assay Western Blot (Recombinant protein) Antibody Production Protein Array
Notes	Best use within three months from the date of receipt of this protein.
Storage	Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.
Storage Buffer	50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

GENE INFORMATION

Gene Name	CRYBB3 crystallin, beta B3 [Homo sapiens]
Official Symbol	CRYBB3
Synonyms	CRYBB3; crystallin, beta B3; CRYB3; beta-crystallin B3; beta-B3 crystallin; eye lens structural protein; CATCN2; MGC125772; MGC125773; MGC125774
Gene ID	1417
