

Recombinant Full Length Human CSF2RA Protein

Cat. No. CSF2RA-2167HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human CSF2RA full-length ORF (NP_006131.2) recombinant protein without tag.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	400 amino acids
Description	The protein encoded by this gene is the alpha subunit of the heterodimeric receptor for colony stimulating factor 2, a cytokine which controls the production, differentiation, and function of granulocytes and macrophages. The encoded protein is a member of the cytokine family of receptors. This gene is found in the pseudoautosomal region (PAR) of the X and Y chromosomes. Multiple transcript variants encoding different isoforms have been found for this gene, with some of the isoforms being membrane-bound and others being soluble. [provided by RefSeq, Jul 2008]
