

# Recombinant Full Length Human CTSV Protein, GST-tagged

**Cat. No.** CTSV-2359HF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| <b>ProteinLength</b>    | 334 amino acids                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>Description</b>      | The protein encoded by this gene, a member of the peptidase C1 family, is a lysosomal cysteine proteinase that may play an important role in corneal physiology. This gene is expressed in colorectal and breast carcinomas but not in normal colon, mammary gland, or peritumoral tissues, suggesting a possible role for this gene in tumor processes. Alternatively spliced variants, encoding the same protein, have been identified. [provided by RefSeq, Jan 2011] |
| <b>Molecular Mass</b>   | 63.7 kDa                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|                         |                                                                                                                   |
|-------------------------|-------------------------------------------------------------------------------------------------------------------|
| <b>Applications</b>     | Enzyme-linked Immunoabsorbent Assay<br>Western Blot (Recombinant protein)<br>Antibody Production<br>Protein Array |
| <b>Notes</b>            | Best use within three months from the date of receipt of this protein.                                            |
| <b>Storage</b>          | Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.                                          |
| <b>Storage Buffer</b>   | 50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.                                          |
| <b>GENE INFORMATION</b> |                                                                                                                   |
| <b>Gene Name</b>        | CTSV cathepsin V [ Homo sapiens (human) ]                                                                         |
| <b>Official Symbol</b>  | CTSV                                                                                                              |
| <b>Synonyms</b>         | CTSL2; cathepsin L2; CTSU; CTSV; cathepsin U; cathepsin V; cathepsin L2, preproprotein; CATL2; MGC125957;         |
