

# Recombinant Full Length Human DMAC1 Protein

**Cat. No.** DMAC1-2684HF    **Lot. No.** (See product label)

## SPECIFICATION

|                         |                                                                                                                             |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| <b>Product Overview</b> | Human C9orf123 full-length ORF (ADZ15990.1) recombinant protein without tag.                                                |
| <b>Species</b>          | Human                                                                                                                       |
| <b>Source</b>           | In Vitro Cell Free System                                                                                                   |
| <b>ProteinLength</b>    | 614 amino acids                                                                                                             |
| <b>Description</b>      | DMAC1 (distal membrane arm assembly complex 1) is a Protein Coding gene.                                                    |
| <b>Form</b>             | Liquid                                                                                                                      |
| <b>Molecular Mass</b>   | 12.8 kDa                                                                                                                    |
| <b>AA Sequence</b>      | MGSRLSQPFESYITAPPGTAAAPAKPAPPATPGAPTSPAHRLLKTCWSCRVL SGL<br>GLMGAGGYVYWVARKPMKMGYPSPWTITQMVIGLSENQGIATWGIVVMADPKGK<br>AYRVV |
| <b>Applications</b>     | Antibody Production<br>Functional Study<br>Compound Screening                                                               |
| <b>Notes</b>            | Best use within three months from the date of receipt of this protein.                                                      |
| <b>Storage</b>          | Store at -80 centigrade. Aliquot to avoid repeated freezing and thawing.                                                    |

**Storage Buffer** 25 mM Tris-HCl of pH8.0 containing 2% glycerol.

## GENE INFORMATION

|                        |                                                                                                                                        |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| <b>Gene Name</b>       | DMAC1 distal membrane arm assembly complex 1 [ Homo sapiens (human) ]                                                                  |
| <b>Official Symbol</b> | DMAC1                                                                                                                                  |
| <b>Synonyms</b>        | DMAC1; distal membrane arm assembly complex 1; C9ORF123; chromosome 9 open reading frame 123; transmembrane protein C9orf123; MGC4730; |
| <b>Gene ID</b>         | 90871                                                                                                                                  |
| <b>mRNA Refseq</b>     | NM_033428                                                                                                                              |
| <b>Protein Refseq</b>  | NP_219500                                                                                                                              |
| <b>MIM</b>             | 617261                                                                                                                                 |
| <b>UniProt ID</b>      | Q96GE9                                                                                                                                 |
