

Recombinant Full Length Human CD47 Protein

Cat. No. CD47-2993HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human CD47 full-length ORF (NP_001768.1) recombinant protein without tag.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	99 amino acids
Description	This gene encodes a membrane protein, which is involved in the increase in intracellular calcium concentration that occurs upon cell adhesion to extracellular matrix. The encoded protein is also a receptor for the C-terminal cell binding domain of thrombospondin, and it may play a role in membrane transport and signal transduction. This gene has broad tissue distribution, and is reduced in expression on Rh erythrocytes. Alternatively spliced transcript variants have been found for this gene. [provided by RefSeq, Jul 2010]
