

Recombinant Full Length Human CDH23 Protein

Cat. No. CDH23-3148HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human CDH23 full-length ORF (ADZ15527.1) recombinant protein without tag.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	531 amino acids
Description	This gene is a member of the cadherin superfamily, whose genes encode calcium dependent cell-cell adhesion glycoproteins. The encoded protein is thought to be involved in stereocilia organization and hair bundle formation. The gene is located in a region containing the human deafness loci DFNB12 and USH1D. Usher syndrome 1D and nonsyndromic autosomal recessive deafness DFNB12 are caused by allelic mutations of this cadherin-like gene. Upregulation of this gene may also be associated with breast cancer. Alternative splice variants encoding different isoforms have been described. [provided by RefSeq, May 2013]
