

Recombinant Full Length Human H6PD Protein, GST-tagged

Cat. No. H6PD-3413HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human H6PD full-length ORF (AAH81559.1, 1 a.a. - 791 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	791 amino acids
Description	There are 2 forms of glucose-6-phosphate dehydrogenase. G form is X-linked and H form, encoded by this gene, is autosomally linked. This H form shows activity with other hexose-6-phosphates, especially galactose-6-phosphate, whereas the G form is specific for glucose-6-phosphate. Both forms are present in most tissues, but H form is not found in red cells. [provided by RefSeq
