

Recombinant Full Length Human CLP1 Protein, GST-tagged

Cat. No. CLP1-3450HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human HEAB full-length ORF (NP_006822.1, 1 a.a. - 425 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	425 amino acids
Description	This gene encodes a member of the Clp1 family. The encoded protein is a multifunctional kinase which is a component of the tRNA splicing endonuclease complex and a component of the pre-mRNA cleavage complex II. This protein is implicated in tRNA, mRNA, and siRNA maturation. Mutations in this gene are associated with pontocerebellar hypoplasia type 10 (PCH10). Alternatively splice transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Sep 2014]
