

Recombinant Human TNFSF13, T7-tagged

Cat. No. TNFSF13-5106H **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Recombinant human TNFSF13 protein, fused to T7-tag at N-terminus, was expressed in E.coli.
Species	Human
Source	E.coli
Description	TNFSF13 is a member of the tumor necrosis factor (TNF) ligand family. This protein is a ligand for TNFRSF17/BCMA, a member of the TNF receptor family. TNFSF13 and its receptor are both found to be important for B cell development. In vitro experiments suggested that this protein may be able to induce apoptosis through its interaction with other TNF receptor family proteins such as TNFRSF6/FAS and TNFRSF14/HVEM. Alternative splicing results in multiple transcript variants.
