

Recombinant Full Length Human HIPK4 Protein, GST-tagged

Cat. No. HIPK4-3535HF **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Human HIPK4 full-length ORF (NP_653286.2, 1 a.a. - 616 a.a.) recombinant protein with GST-tag at N-terminal.
Species	Human
Source	In Vitro Cell Free System
ProteinLength	616 amino acids
Description	This gene encodes a member of the homeodomain interacting protein kinase (HIPK) family of proteins. While other members of this family are found throughout vertebrates, this member is present only in mammals. Compared to other members of this family, the encoded protein lacks a nuclear localization signal and a C-terminal autoinhibitory domain. The encoded protein exhibits kinase activity and may phosphorylate the tumor suppressor protein p53. [provided by RefSeq, Jul 2016]
